Gran caja anidable con tapa, utilizada sobre todo en mudanzas. Ideal para transportar equipos informáticos y electrónicos. Puede equiparse con una alfombrilla antiestática especial.

Categoría: Cajas de plástico, Cajas de distribución,

Descripción del producto

Plastic distribution container - 800x600x518mm for rent

High quality plastic container for transporting goods. Capacity of 180L. Made of durable plastic offers a considerable amount of space. Special spaces for labels located on the shorter sides

Nested design, integrated lid

The nested design of the plastic container allows for stacking when the container is loaded and has the lid closed. Empty containers can be stacked 1-in-2 - nested - to save space in transport and storage.

Ideal for transporting computer equipment during a

move

This large plastic container is a great solution when moving in offices, libraries, warehouses or schools. Thanks to the lid, it provides greater security for the goods. It is dustproof and light-proof. In addition, a special anti-static mat can be installed on the bottom of the container, providing greater safety for the transported electronic equipment.

The container can be sealed for transport
